PROFILE

I build the product behind the idea.

Founder of Cipher Development. I help founders, agencies, and growing teams turn ambiguous ideas into focused AI SaaS and production web applications - from technical scoping through launch, iteration, and support.

35+

Production apps

AI, SaaS, workflow, e-commerce

6

Countries served

Remote clients across four continents

5.0★

Client rating

Repeat work and long-term retainers

EXPERIENCE

Cipher Development Founder & Lead Engineer

2024 - Present

- **Shipped 35+ production applications** across AI, SaaS, e-commerce, workflow automation, and no-code migrations for clients in six countries.
- Own the full engagement: **scope the product, engineer the system, deploy it, and support it after launch.**
- Built repeat relationships across the US, Israel, Uganda, Germany, and Nigeria through clear communication and reliable delivery.

WHAT I BRING TO THE BUILD

01 Product clarity

Turn loose briefs into practical scope, user flows, and technical decisions.

02 Full-stack delivery

Build the frontend, backend, data layer, integrations, and deployment path.

03 AI that works

Production Claude and OpenAI features for analysis, content, agents, and retrieval.

04 Trusted recovery

Untangle broken apps, difficult migrations, performance issues, and launch blockers.

PROJECTS THAT MADE AN IMPACT

Useful systems for real operational problems.

A selection of projects where I shaped the product and shipped the technical work end-to-end. Full case studies and live links are available at oyinloluwa.dev.

01

RealTalk Referee

AI SaaS | 2025 - 2026

Built Claude-powered relationship mediation SaaS with Stripe subscriptions, a progressive payroll, multi-language support, shareable verdicts, and real-time Live Mode. Delivered two consecutive contracts worth \$4K+.

02

PerfectMatchSchools

Matching ATS | 2025 - Present

Designed a two-sided teacher-school platform with fit scoring, messaging, email verification, and an admin ATS. The engagement grew into a long-term retainer.

03

JengaTrack

Construction operations | 2025

Built a WhatsApp-first construction workflow that pairs a Supabase office dashboard with Twilio-powered field updates and photo logs - no new app required for supervisors.

04

Bidly

Founder project | 2026

Built and launched an AI proposal generator with context-aware creation, scoring, pricing, usage analytics, and an admin dashboard. I use it in my own client acquisition workflow.
