RealTalk Referee — AI-powered SaaS

2025–2026 · \$4K+ · 2-phase contract

Built a Claude AI-powered relationship argument analyzer with progressive Stripe paywall, multi-language support, shareable verdict links, and a real-time Live Mode. Two consecutive contracts with the same buyer — repeat business confirms reliability.

React · TypeScript · Vite · Node.js · Express · Supabase · Claude API · Stripe · Vercel · Railway → [app.realtalkreferee.ai](#)

PerfectMatchSchools — Two-sided matching ATS

2025 · Long-term retainer

Designed and built a teacher-school matching platform with archetype-based fit scoring, two-sided messaging, and email verification. Took messy founder requirements and turned them into a production-grade ATS — engagement extended into multi-month retainer.

React · TypeScript · Supabase · Resend · Tailwind → [perfectmatchschool.com](#)

JengaTrack — Construction PM with WhatsApp

2025 · Full delivery

Solved a workflow problem traditional dashboards couldn't: built a Supabase-backed PM platform where field supervisors update construction sites via WhatsApp through Twilio. Office staff use the dashboard, field workers stay in the messaging app they already live in.

React · TypeScript · Supabase · Twilio · WhatsApp Business API

Bidly — My own SaaS (proof of recursive trust)

2026 · Founder + sole engineer

Built and shipped Bidly.space, an AI proposal generator for freelancers powered by Claude. Includes scoring rubric, usage analytics, two-tier pricing, and admin dashboard. I use Bidly to write the proposals that win contracts like RealTalk Referee — eating my own cooking.

Next.js · Convex · Clerk · Claude API · TypeScript · Tailwind → [bidly.space](#)

WHAT I BUILD FOR YOU

01 →

Ship an MVP in 2 Weeks

Idea to deployed product. Auth, payments, dashboard, full stack. Founders go to market without compromising on quality.

03 →

AI Integration That Ships

Claude/OpenAI features that work in production: RAG, content generation, smart agents, real-time analysis.

02 →

Migrate Off No-Code

Outgrowing Bubble, Base44, or Webflow? I rebuild on production-grade infra without losing a single feature.

04 →

Senior-Level Recovery

Bug-hunting, perf optimization, deployment headaches, DNS/SSL issues. Senior debugging when something's on fire.

TECH STACK

FRONTEND	React · Next.js · TypeScript · Tailwind CSS · Framer Motion · Vite
BACKEND	Node.js · Express · Convex · Python · FastAPI
DATABASES	PostgreSQL · Supabase · Firebase · Firestore · MongoDB
AI / ML	Claude API · OpenAI · Google Vision · LangChain · RAG
INFRA	Vercel · DigitalOcean · AWS · Railway · Cloudflare · Docker
PAYMENTS	Stripe · PayPal · Lemon Squeezy
NO-CODE	Base44 · Bubble · Webflow · GoHighLevel · Iterable
DEVOPS	Git · GitHub Actions · Linux · CI/CD pipelines

RECOGNITION

- ★ 5-star ratings from clients across SaaS, EdTech, real estate, and infrastructure
- ★ Founder, **Cipher Development**
- ★ Featured portfolio: oyinloluwa.dev

ABOUT

Lagos-based full-stack developer running Cipher Development. I work best on ambitious projects with clear constraints — solo founders shipping their first SaaS, established businesses migrating off no-code, and agencies needing senior help on critical builds. I care about craft, communicate aggressively, and finish what I start. **Currently available for new contracts in the \$1K-15K range.**
